About Nespet Farms

Nespet Farms is a Palm Kernel plantation, comprising hundreds of hectares of Palm trees, which we harvest for Refined Bleached Deodorized Palm Olein, Crude Palm Kernel Oil, Crude Palm Oil, as well as other fats and oils. With a dynamic team of farmers, palm oil experts and customer services, we have a proven track record for providing sustainable Palm Kernel Oil and other related products, to the Ghanaian market and for export.

Our nursery also produces healthy palm oil seedlings, with the potential for sustaining large oil yields for 25 years or more. With good synergy amongst our traders and customers, we always ensure the highest standards of farming, refining, packaging and supply of our products worldwide.

How We Do It

We have developed stringent in-house quality control for all incoming Palm Oil seedlings to outgoing products, and use the most up to date methods prescribed via gas chromatography, to verify that our oils and fats meet the required specifications and industry standards.

We offer great prices and fast delivery of our quality products to short and long-term customers, and can also supply Corn and other farm produce to reliable buyers.

At Nespet Farms, we recognize that the well being of our society and environment is essential to our growth. We are always looking into the area of sustainability, and how we can contribute to the society and the environment in a responsible manner.
